Speaker Introduction

Speaker: Erin Dalton

Erin Dalton is Director of the Office of Analytics, Technology and Planning at the Allegheny County Department of Human Services, where she responsible for directing the research and evaluation, evidence-based planning and information technology activities of the Department of Human Services.

Erin has held policy positions with the Allegheny County Executive's Office and the United States Department of Justice and was an adjunct staff member at the RAND Corporation.

Allegheny County Department of Human Services

Using Integrated Data to Support Practice

– What if you start by listening to clients and considering your agency part of the community you serve?

– So much good stuff

FILA

Data to Support Coordinated Care

In Allegheny County, rich data are available to:

- DHS staff (15+ years)
- Provider network
- Clients themselves

A Few Insights

Over half (53%) the children attending Pittsburgh Public Schools were involved in the human services systems, 30% had child welfare involvement.

Half of the children who had an arrest with the school police experienced an adult arrest by age 21, 32% had a jail booking. Nearly 80% African American.

43% of women who aged-out of child welfare had a baby by age 21, but this has decreased significantly in the last few years (last 3 years, 35%). But more of these young adults seem to be experiencing homelessness (16% last year compared to previous average of 8%).

32% percent of Pittsburgh Bureau of Police arrestees had previously received treatment for substance use disorders.

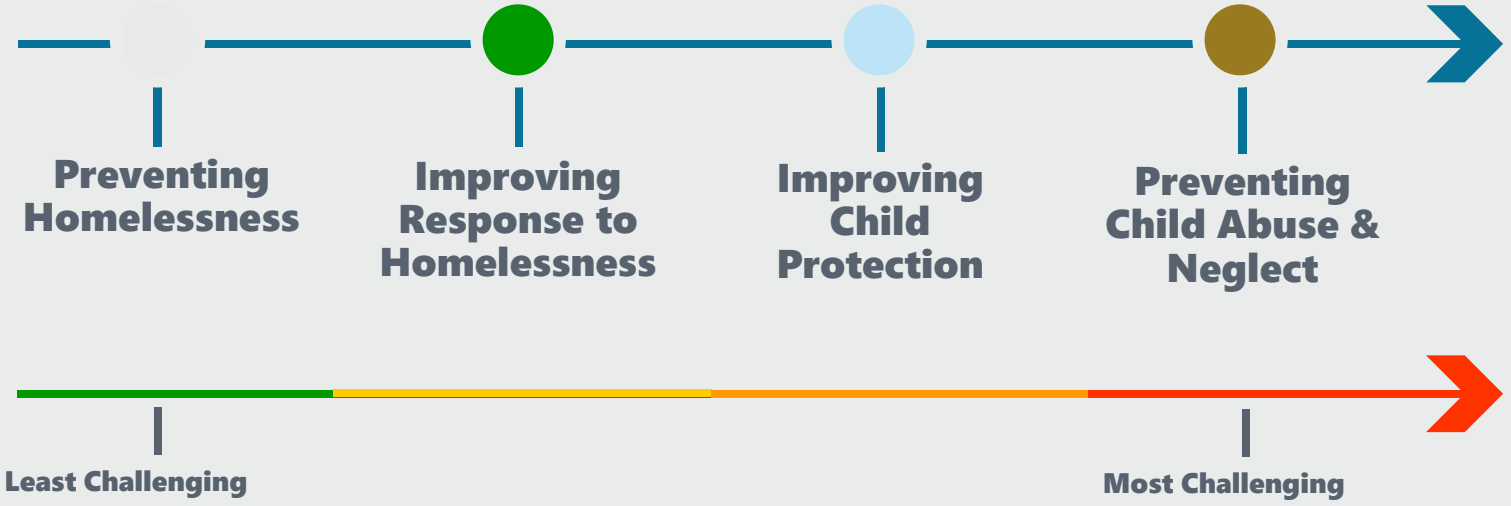
Unexpected traumatic death (homicide, suicide, overdose) of parents leaves behind several hundred children per year. Spikes in receipt of services, particularly mental health services and need for child protection, seen in two years after death but after return to baseline. Children of homicide and suicide victims more likely to chronically absent than children of parents who died of overdose.

Try me: I can answer any question you have, most in 3 hours to 3 days. Outcome analysis is push-button

Nothing that can be measured with administrative data needs to be collected: earnings, births, re-admission etc.

–And support to use data to improve critical decisions

Improving Key Decisions with Predictive Risk Modeling



–And you relentlessly give back

Results-Oriented Accountability for Grants Cross Agency Priority Goal (Grants CAP Goal)

Maximize the value of grant funding by applying a risk-based, data driven framework that balances compliance requirements with demonstrating successful results for the American taxpayer.

GOAL STATEMENT

Grants CAP Goal Strategies

Standardize Business Processes & Data: Standardize grants management business processes & identify, operationalize, standardize, & link data.

Build Shared IT Infrastructure: Use standard business processes & data to identify opportunities to build shared solutions that reduce burden & improve the user experience.

Manage Risk: Leverage data, including data from annual audits, to assess & manage recipient risk.

Achieve Program Goals & Objectives: Hold recipients accountable for good performance practices that support achievement of program goals & objectives; & streamline burdensome compliance requirements for those that demonstrate results.
