Goal Statement

- Maximize the value of grant funding by applying a risk-based, data-driven framework that balances compliance requirements with demonstrating successful results for the American taxpayer.

Challenge

- The Federal government uses grants to invest approximately \$700 billion each year in mission-critical needs for American taxpayers, but managers report spending 40% of their time using antiquated processes to monitor compliance instead of analyzing data to improve results.

Opportunity

- Standardize the grants management business process and identify, open, standardize, and link data. Use standard business process and data to establish a robust marketplace of modern solutions that ease burden and drive efficiencies, respond to customer needs, and deliver on mission. Leverage data, including data produced by annual audits, to assess and manage recipient risk. Hold recipients accountable for good performance practices that support achievement of program goals and objectives and streamline burdensome compliance requirements for those that demonstrate results.

Leadership

Executive Steering Committee

The Executive Steering Committee holds the primary responsibility for developing a governance structure for the CAP goal. It is the overarching governing body for all government-wide work groups related to grants and reports to the Chief Financial Officers Council. The ESC also includes the participation from the Financial Assistance Committee for E-Government

Strategy Leads

For each CAP goal strategy, ESC members are designated as strategy leads. Strategy leads serve as the executive sponsors for the strategy, providing strategic support, leadership, and vision for their respective strategy.

Participating Agencies

All major grant making agencies are encouraged to participate and contribute to the execution of this goal. This includes active participation in government-wide workgroups that inform each strategy.

Goal Structure

Strategy 1: Operationalize the Grants Management Standards

Operationalize and maintain the grants management standards to streamline recipient reporting, increase transparency, support the development of future shared solutions, and implement the GREAT Act.

Strategy 2: Establish a Robust Marketplace of Modern Solutions

Use standard business processes and data to establish a robust marketplace of modern solutions that ease burden and drive efficiencies, respond to customer needs, and deliver on mission.

Strategy 3: Manage Risk

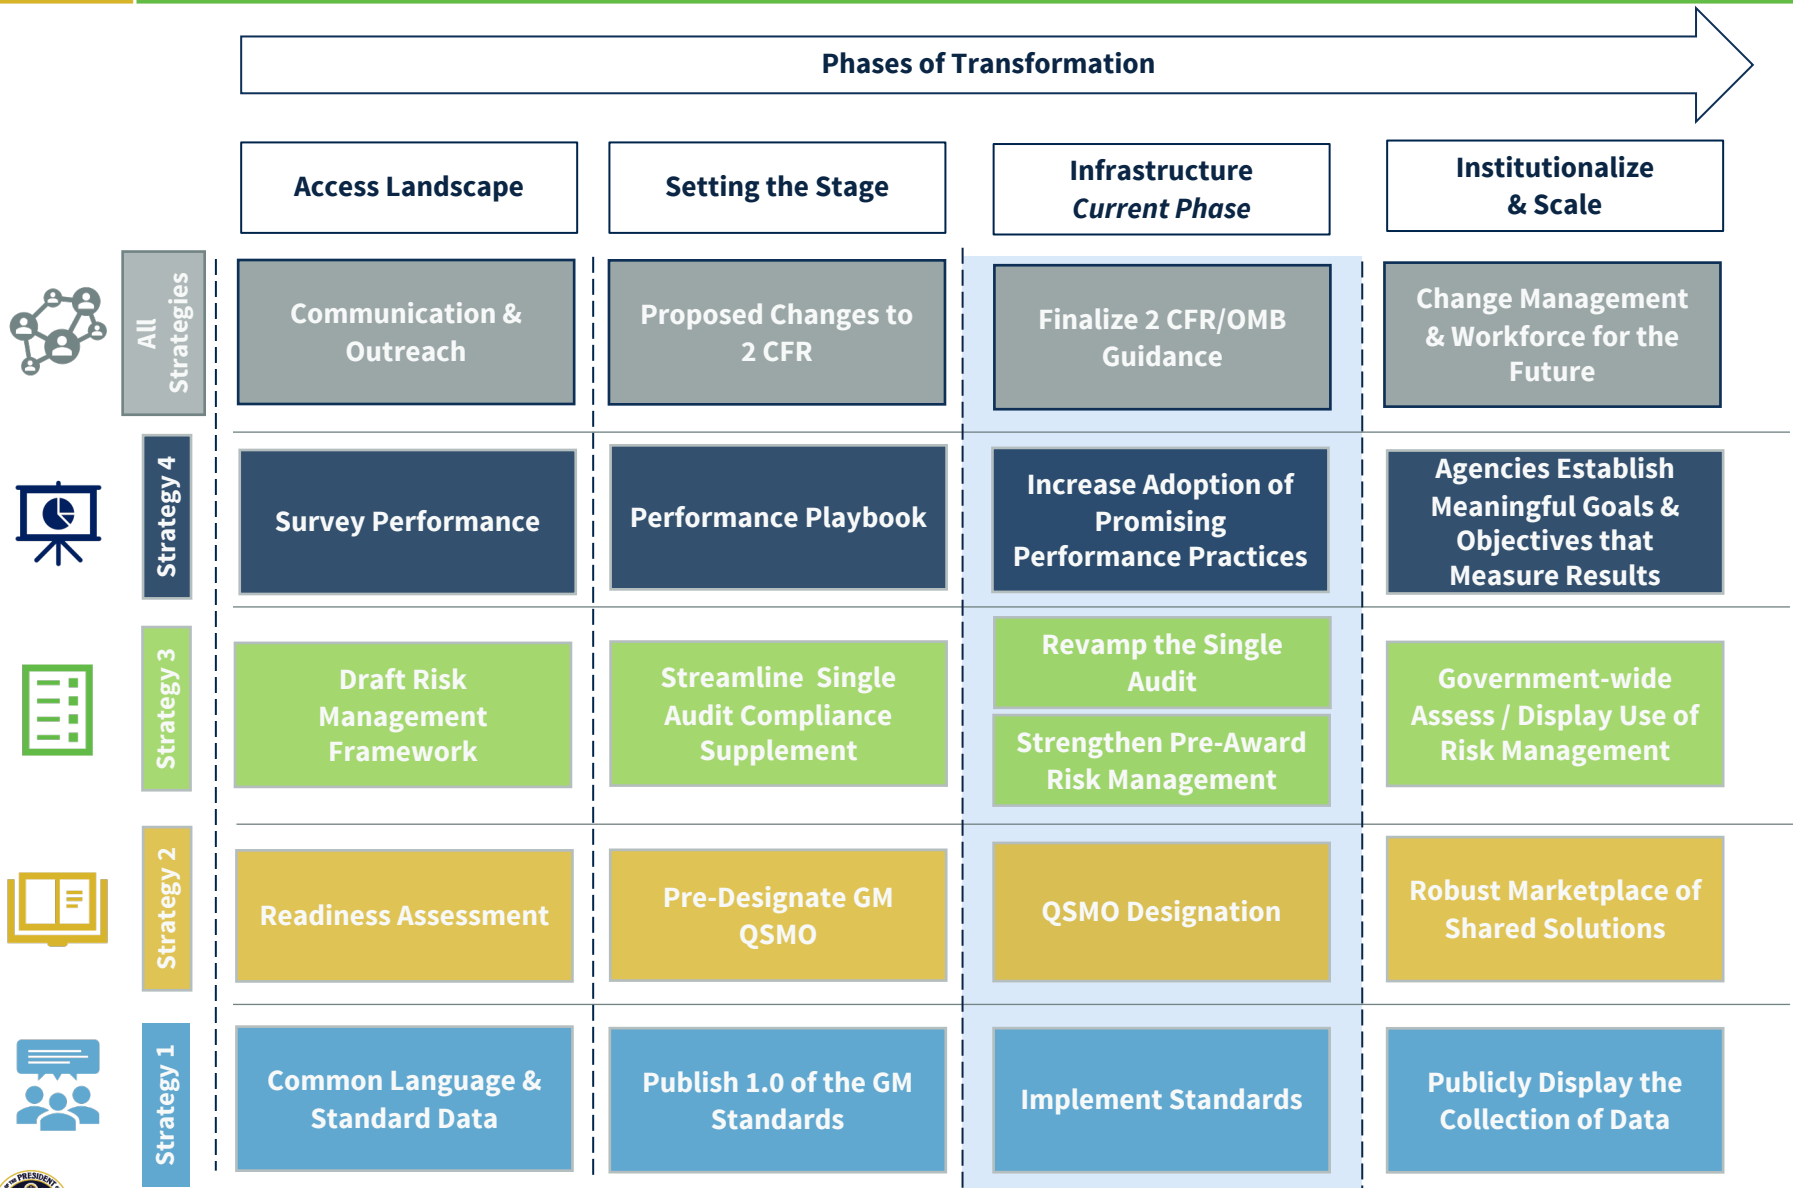

Leverage data, including data produced by annual audits, to assess and manage recipient risk.

Strategy 4: Achieve Program Goals and Objectives

Hold recipients accountable for good performance practices that support achievement of program goals and objectives and streamline burdensome compliance requirements for those that demonstrate results.

Strategy 1: Operationalize the Grants Management Standards

This strategy recognizes that recipient burden (such as excessive compliance requirements) can be reduced if the Federal government standardizes the grants management business process. Prior milestones under this strategy are completed and the focus has shifted to operationalizing the grants management standards in support of GREAT Act Implementation. This strategy was formally known as “Standardize the Grants Management Business Process & Data”, see Appendix for additional details.

Strategy 2: Establish a Robust Marketplace of Modern Solutions

Leverage standards to identify opportunities that establish a robust marketplace of modern solutions, reducing administrative burden and improving the user experience. Future solutions will increase access to and use of data to support powerful analytics, setting the stage for risk-based performance management. This strategy was formally known as “Build Shared IT Infrastructure” and supports the Sharing Quality Services CAP Goal. Additional details regarding completed milestones associated with this strategy are available in the Appendix.

Strategy 3: Manage Risk

Agencies need to actively manage risk to assess the applicant's capabilities to deliver the proposed results. In order to do this, agencies need to have ready access to performance data and have the data infrastructure to include performance in risk modeling. The recent proposed updates to OMB guidance on grants included requirements for performance reporting in grants, however there is much more that can be done to identify practices and data tools to enable agencies to incorporate performance into their grant award operations. This strategy also recognizes there is an opportunity to reform the Single Audit requirements and process to improve the management of risk.

Strategy 4: Achieve Program Goals & Objectives

It is a challenge to show that Federal dollars are spent wisely and that those dollars have the intended impact and produced value to the taxpayer. Strategy 4 aims to tell the American people the value for the funds spent on Financial assistance. Strategy 4 is a long-term strategy focused on demonstrating grant program results by assessing the landscape of current performance practices, promoting a common understanding of performance practices and tools, proposing revisions to guidance, developing and implementing a change management strategy, launching a national dialogue, and producing a centralized location for performance data for consumers.
