4  Continuous Performance Improvement	<ul style="list-style-type: none"> • Establish and implement outcome-based performance metrics and measures • Develop a Research and Innovation program to inform policy, process, and technology with empirical data-driven decisions • Establish a Continuous Performance Improvement model that will continuously evaluate the performance of the SSC policies and processes

Summary of Progress

Executive Agents Take Bold Action to Reduce Investigation Inventory. In an Executive Correspondence released on June 5th, the Security Executive Agent (ODNI) and Suitability and Credentialing Executive Agent (OPM) approved measures focused on reducing and mitigating the background investigation inventory. The approved measures make thoughtful, risk-based modifications to the background investigation process. Since the Executive Correspondence release, the National Background Investigation Bureau has reduced their background investigation inventory by over 9%, from 725,000 to 657,000. Reductions are expected to continue as policy changes are further implemented.

White House Plans Move of Background Investigation Mission to the Department of Defense. The White House Reform Plan and Reorganization Recommendations released on June 21st included the transfer of the background investigation mission from the Office of Personnel Management to the Department of Defense. The transfer provides the opportunity to achieve an efficient, effective, fiscally viable, and secure operation that meets all agencies' needs. It avoids potential problems inherent in splitting the existing program and provides the means to achieve bold, transformative reform in the manner in which background investigations are conducted. Opportunities exist to improve timeliness, strengthen management of sensitive information, and ensure a more trusted workforce.

Development Begun to Rebuild Background Investigation Systems. In June, the Department of Defense awarded a contract to develop new systems to replace the legacy systems currently used in the background investigation process. This platform is a critical component in modernizing the legacy background investigation technology and processes while establishing a new suite of end-to-end shared services. Releases of the Position Designation Tool and eApplication are planned for the near future.

Key Milestones

Sub-Goal 1: Trusted Workforce

- **Challenge:** Information of concern often goes unreported in the Federal Government, which inhibits an agency's ability to address potential issues before escalation.
- **Theory of Change:** The SSC must work toward instilling a sense of shared responsibility by enabling a trusted workforce through consistent reporting requirements, employee and supervisor training, awareness campaigns for reportable behaviors, and identification of gaps in information sharing with sister missions.
