

## Results Oriented Accountability for Grants

### Goal Leaders

**Fred Nutt**, Senior Advisor, Office of Management and Budget

**Tim Soltis**, Deputy Controller, Office of Management and Budget

**Sheila Conley**, Deputy Chief Financial Officer, Department of Health and Human Services

## Goal Statement

- Maximize the value of grant funding by applying a risk-based, data-driven framework that balances compliance requirements with demonstrating successful results for the American taxpayer.

## Challenge

- The Federal government uses grants to invest approximately \$700 billion each year in mission-critical needs for American taxpayers, but managers report spending 40% of their time using antiquated processes to monitor compliance instead of analyzing data to improve results.

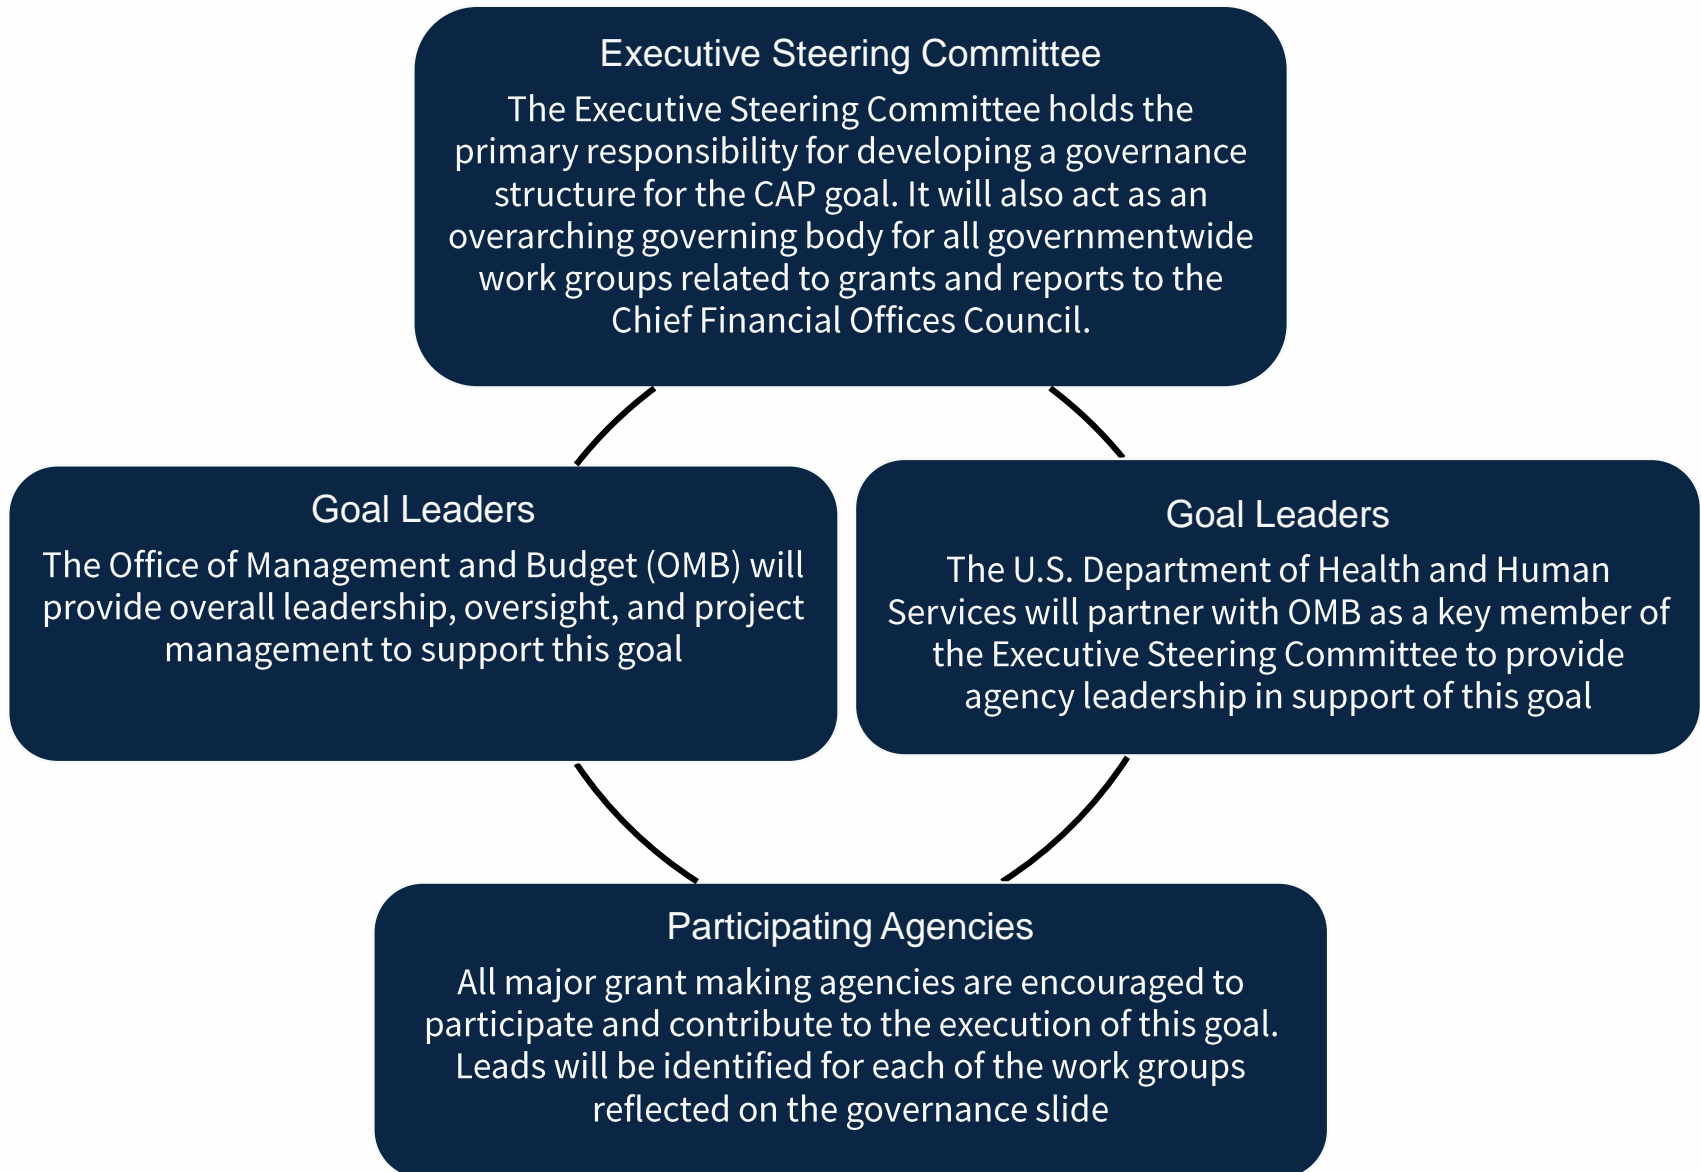

## Opportunity

- Standardize the grants management business process and identify, open, standardize, and link data. Use standard business process and data to identify opportunities to build shared solutions that reduce burden and improve the user experience. Leverage data, including data produced by annual audits, to assess and manage recipient risk. Hold recipients accountable for good performance practices that supports achievement of program goals and objectives and streamline burdensome compliance requirements for those that demonstrate results.

## Leadership

# Goal Structure

## Strategy 1: Standardize the Grants Management Business Process & Data

Standardize the grants management business process and identify, operate, standardize, and link data

## Strategy 2: Build Shared IT Infrastructure

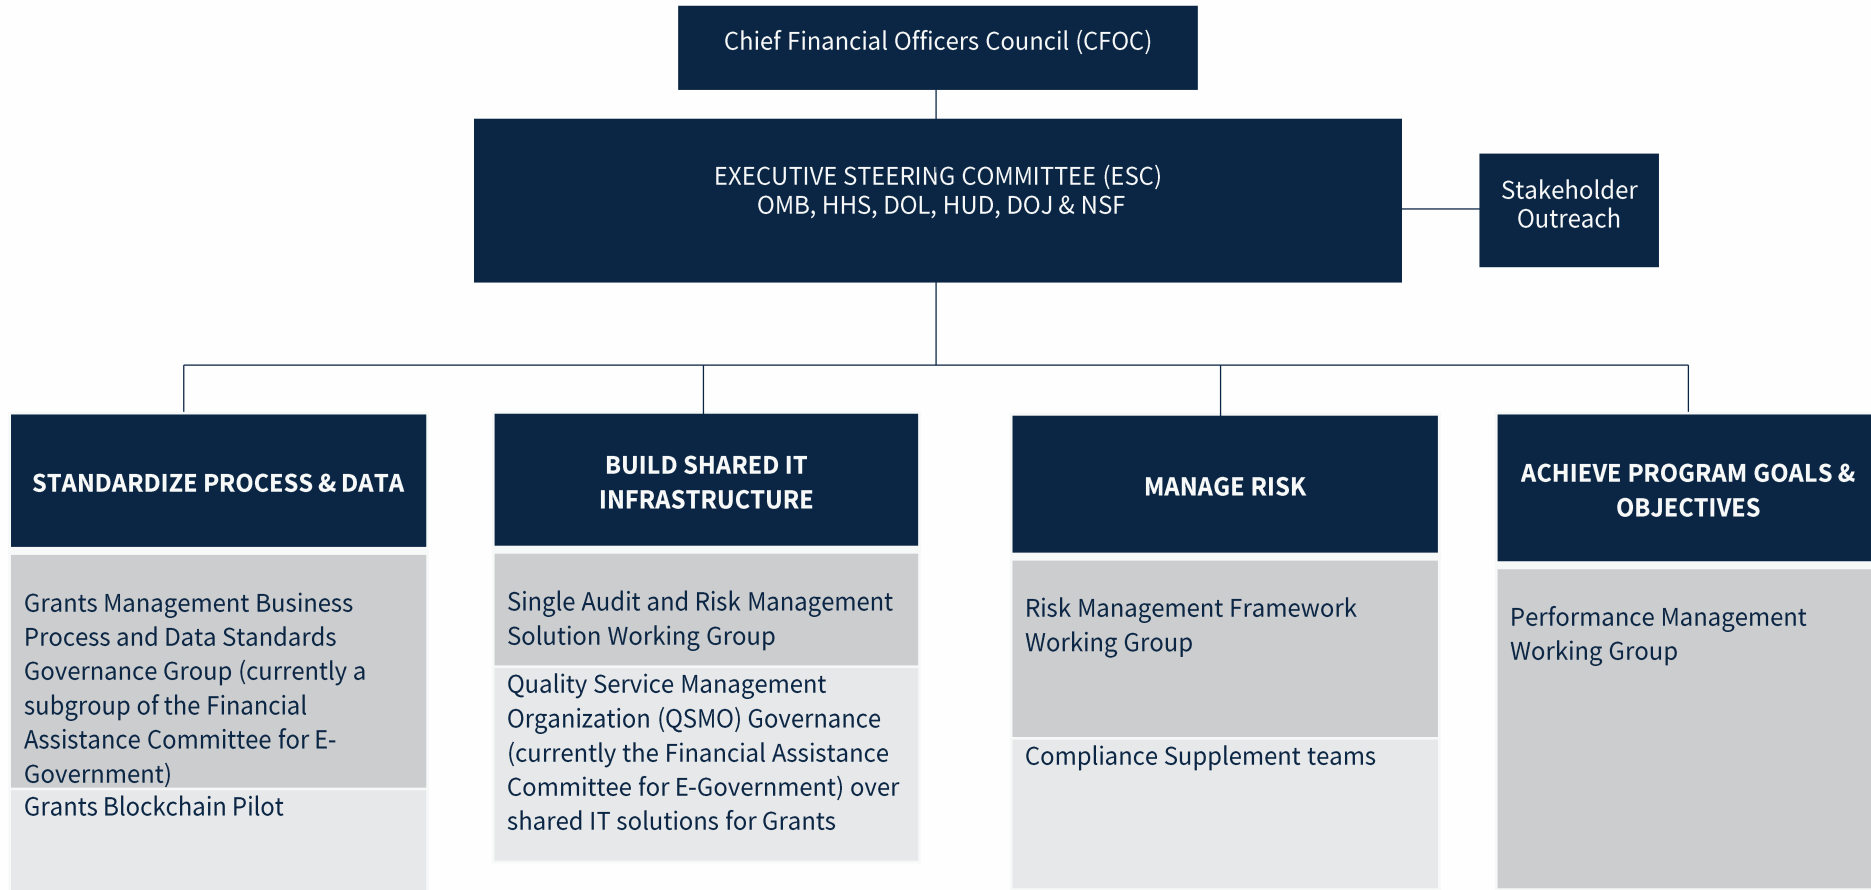

Use standard business process and data to identify opportunities to build shared solutions that reduce burden and improve the user experience.

## Strategy 3: Manage Risk

Leverage data, including data produced by annual audits, to assess and manage recipient risk.

## Strategy 4: Achieve Program Goals and Objectives

Hold recipients accountable for good performance practices that supports achievement of program goals and objectives and streamline burdensome compliance requirements for those that demonstrate results.

### Key Milestones for September – December 2018

- Issued OMB M-18-24, Strategies to Reduce Grant Recipient Reporting Burden
- Released draft of core Grants Management Data Standards
- Completed The Opportunity Project sprint which included two new tools to connect spending to performance
- Completed framework for FY19 Compliance Supplement
- Released a survey to Federal agencies to solicit information on promising performance practices

## Strategy 1: Standardize the Grants Management Business Process and Data

This strategy recognizes that recipient burden (such as excessive compliance requirements) can be reduced if the Federal government standardizes the grants management business process. In addition, recipient burden could be reduced if data is standardized and access to and collection of data is digitized. This strategy supports the Improving the Efficiency and Effectiveness of Administrative Services Across Government and Leveraging Data as a Strategic Asset CAP Goals.

## Strategy 2: Build Shared Infrastructure

Use standard business process and data to identify opportunities to build shared solutions that reduce burden and improve the user experience. Future shared solutions will increase access to and use of data to support powerful analytics, setting the stage for risk-based performance management.

This strategy supports the Improving the Efficiency and Effectiveness of Administrative Services Across Government, Leveraging Data as a Strategic Asset, and Modernizing IT to Increase Productivity and Security CAP Goals.

## Strategy 3: Manage Risk

A comprehensive risk management tool for determining Federal funding awards that are low-risk and high value must include consideration of past performance results, financial risk, and an applicant's capabilities to deliver the proposed results. In order to do this, agencies need to have ready access to performance data and have the data infrastructure to include performance in risk modeling. The recent updated guidance on grants included requirements for performance reporting in grants, however there is much more that can be done to identify practices and data tools to enable agencies to incorporate performance into their grant award operations. This strategy includes an assessment of current capabilities, piloting promising strategies, and developing a framework so that other agencies can leverage these practices. This strategy also supports the Moving from Low-value to High-value Work CAP Goal.

## Strategy 4: Achieving Program Goals & Objectives

To demonstrate achievement of grant program goals and objectives, recipients need to be held accountable for good performance practices. Once recipients can successfully demonstrate strong performance practices, there may be an opportunity to leverage the risk management framework developed in Strategy 3 to alleviate select compliance requirements. Recognizing this is a long term vision, initial efforts focus on surveying and piloting promising performance practices that may be scaled in the future.

Key Milestones	Milestone Due Date	Milestone Status	Change from last quarter	Owner	Anticipated Barriers or other Issues Related to Milestone Completion
